

East Land Quality Forum Achieving Technical Competence for Waste Management

Dr Lawrence Strong
Director General
WAMITAB

Why Technical Competence?

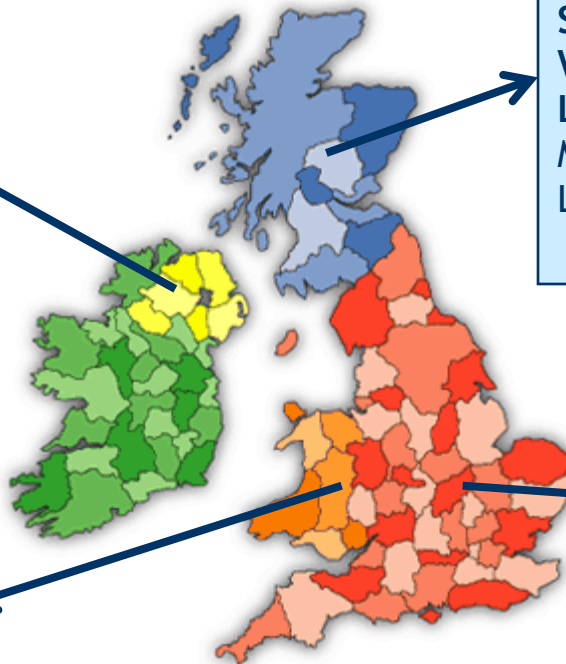

- Compliance with an Environmental Permit
- Provides safe operation for all employees
- Reduces incidents and accidents on site
- Improves standards of operation (waste re-use and transfer)
- Enhances company image with potential clients/regulator

Regulatory Control Framework for Land Remediation in the UK

NORTHERN IRELAND
Waste Management
Licence
Mobile Treatment
Licence (MTL)

SCOTLAND
Waste Management
Licence
Mobile Plant
Licensing

WALES
Environmental
Permitting
Regulations
Standard Rules Permits
for mobile plant

ENGLAND
Environmental
Permitting
Regulations
Standard Rules Permits
for mobile plant

Technical competence

ENGLAND & WALES

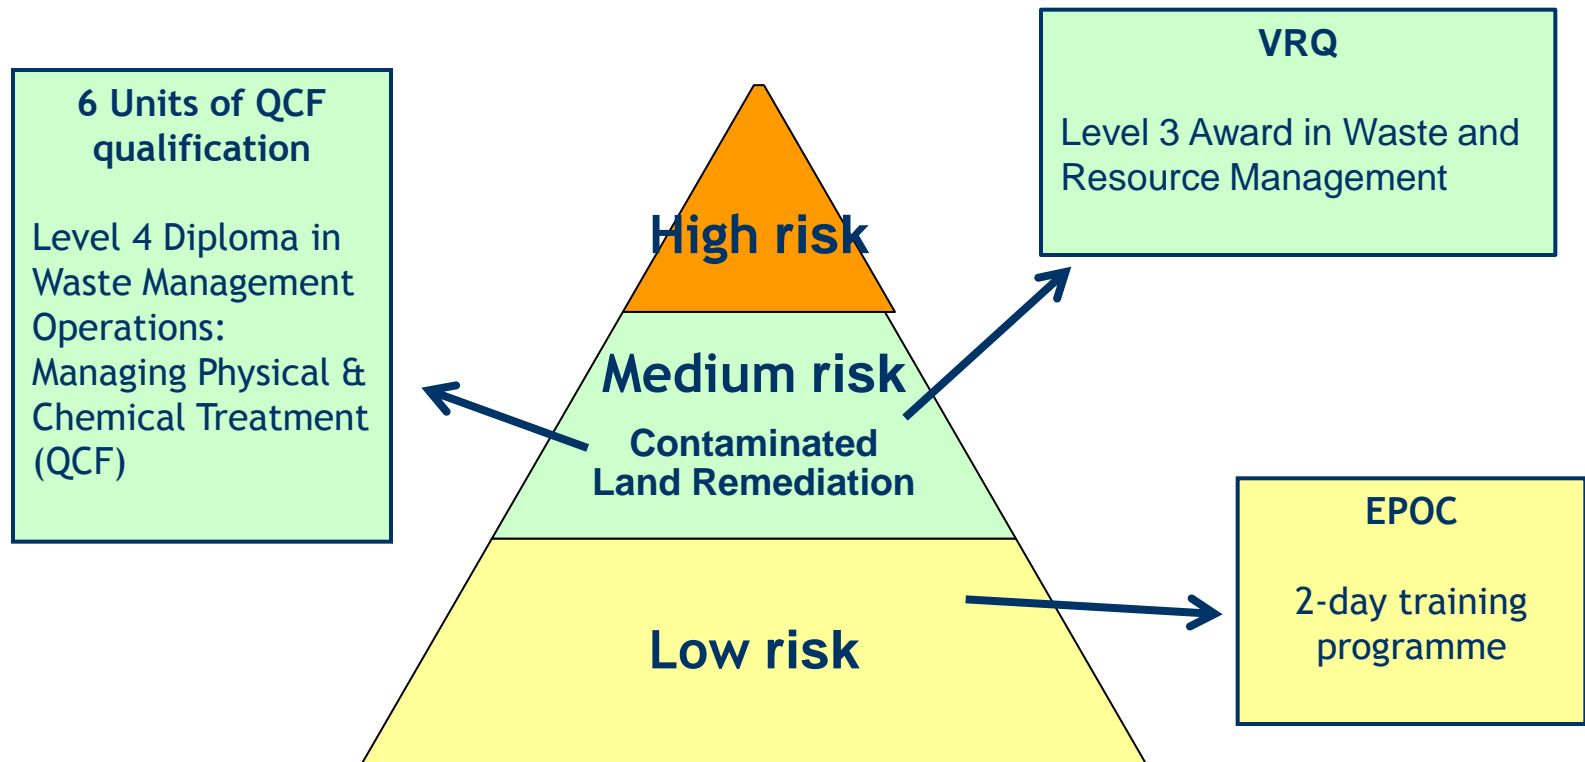

Environmental Permits

- **Standard Permits for Waste Operations - *Recovery or use of waste on land***
 - **SR2008No27** Mobile Plant for the treatment of waste soils and contaminated material, substances or products
 - **SR2010No5** Mobile plant for the reclamation, restoration or improvement of land
 - **SR2010No9** Use of waste for the reclamation, restoration or improvement of land (up to 50,000 tonnes)
 - **SR2010No10** Use of waste for the reclamation, restoration or improvement of land (up to 100,000 tonnes)

Land Remediation

Risk Tier Pyramid and Competence Pathways

Operating Competently

(1)

SR2008No27

6 Units of QCF
qualification

Level 4 Diploma in Waste
Management Operations:
Managing Physical &
Chemical Treatment (QCF)

WM2 - Manage the movement, sorting and storage of waste

HSS3 - Monitor procedures to safely control work operations

MSCE9 - Manage the environmental impact of your work

WM12 - Control work activities on a waste management facility

WM17 - Manage site operations for the remediation of contaminated land

WM18 - Manage the transfer of outputs and disposal of residues from remediation of contaminated land

Operating Competently (2)

WM18 - Manage the transfer of outputs and disposal of residues from remediation of contaminated land

- Manage the transfer of outputs and disposal of residues from land remediation
- Use and communicate data and information
- Resolve problems which arise from the transfer of outputs and disposal of residues from land remediation
- Understand the specific regulation, procedures and requirements for managing the transfer of outputs and disposal of residues from land remediation operations
- Work in a manner which underpins effective performance

Operating Competently (3)

VRQ

Level 3 Award in Waste and Resource Management

- Environmental impact of waste and resources management
- Waste and resources management industry regulatory policy and legislation
- Permitting requirements and compliance in the waste and resources management industry
- Health and safety in the waste and resources management industry
- Technical aspects of managing waste and resources
 - **Managing land remediation activities**
